**Asia Pacific Regional Teams** were seeded into groups 1-4 where the top two teams of each group advanced. **South Asia Regional Teams** were seeded into groups 5-8 where the top two teams of each group advanced. **Africa Regional Teams** were seeded into groups 9-10 where the top four teams of each group advanced. Teams that won no matches are not shown. Within each group, teams are ranked according to:

**Wins** are matches won based on the total raw scores of the arbitrators added to each team's weighted (25%) claimant or respondent skeleton brief score. (caveat: total raw scores can be *distorted* by individual high- or low scoring arbitrators).

**SB** is the total number of wins of those teams against which a team has won. This criterion takes account of the strength of the opposition that a team has faced. [NeustadtI Sonneborn-Berger](#)

**Votes** is the total number of arbitrators who in each match have given a team's two advocates a higher aggregate point total. This criterion flattens out the phenomenon of high- or low scorers and takes account that matches may be won 3:0, 2:1. 1:2 happens if the "1" is an unusually high-scorer and/or the winning team had a significantly higher written score.

**\*z-Points** are the total normalised points a team has received in its four group phase matches. It is rare that over four matches two teams would have the same number of total points, so this can provide a tie-break where other methods fail. Normalising using the "z-score" formula (using standard deviations) seeks to mitigate inequities caused by high- or low scorers (caveat: the quality of statistical methods depends on many variables).

## Elimination Match Tree

In the quarter final, 3<sup>rd</sup> Place and Final matches, the team whose Alias if first alphabetically is Respondent. In the semi final and 5<sup>th</sup> Place matches the team whose Alias if first alphabetically is Claimant.
